

TOP ADJUSTEMENT SMARTPLOT

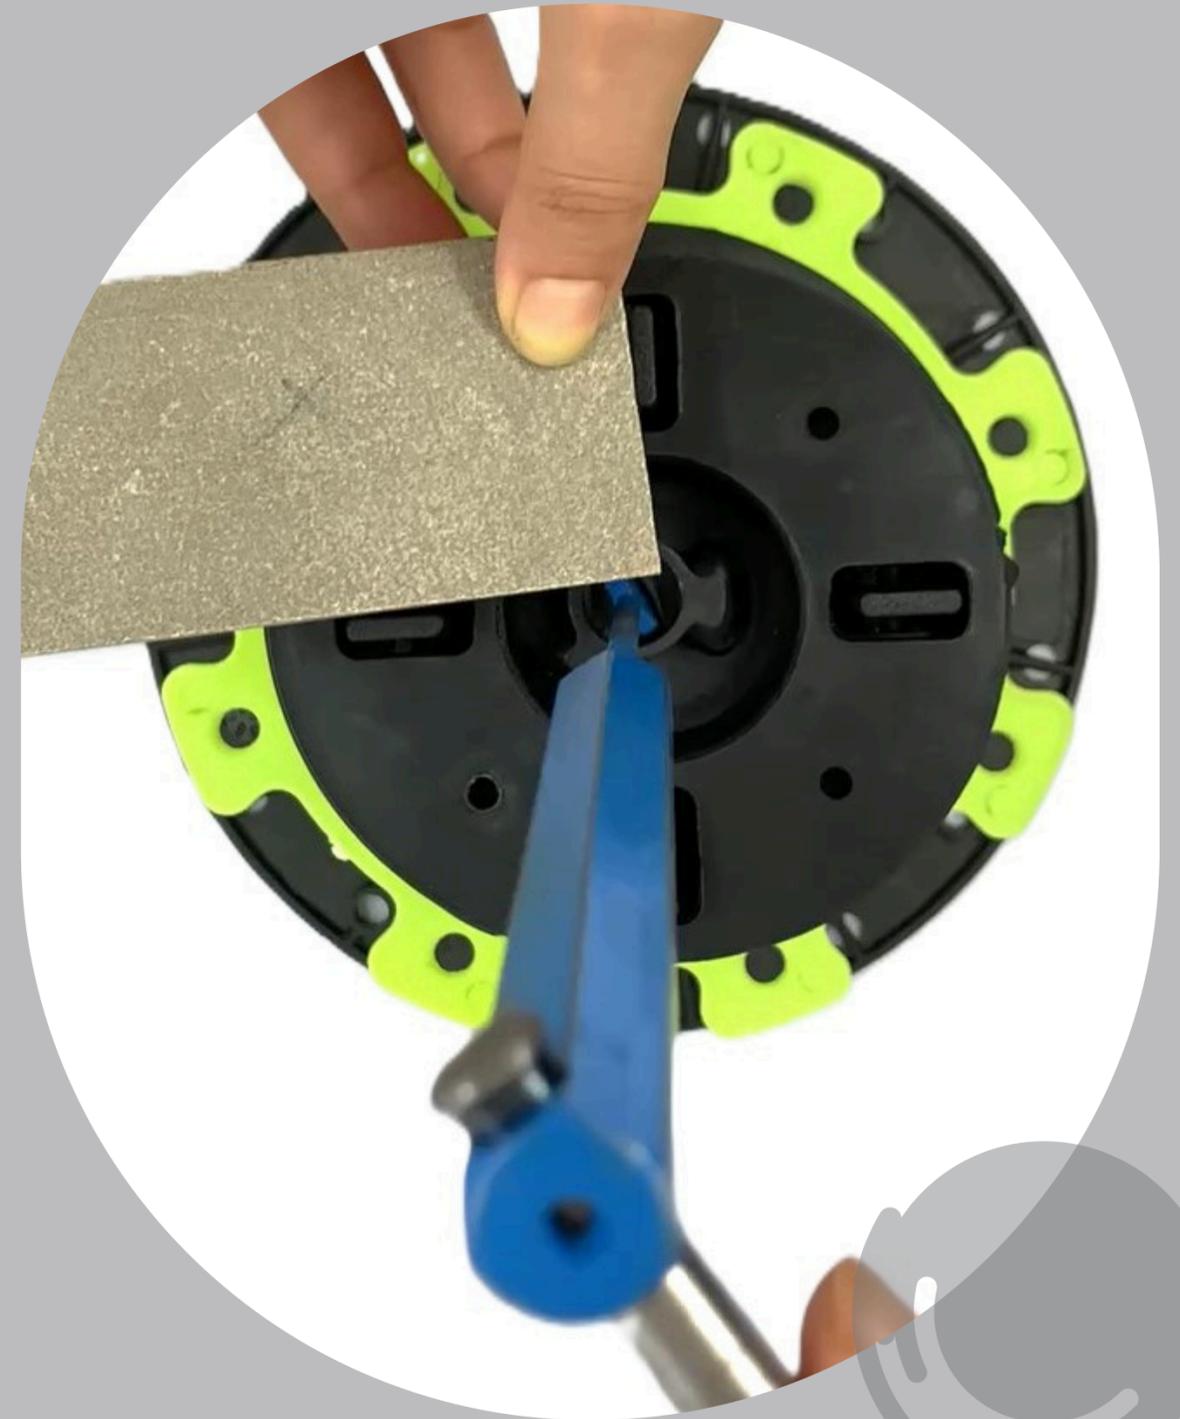

www.smartplot.com.tr

1. WHAT IS TOP ADJUSTEMENT ?

The SmartPlot Top Adjustment System is designed to enhance efficiency and precision in elevated floor installations.

By allowing height adjustments directly from the top of the pedestal, this system simplifies installation and ensures a flawless finish. Ideal for terraces, balconies, walkways, and other outdoor spaces, SmartPlot provides a stable, durable, and professional flooring solution.

2. KEY FEATURES AND BENEFITS

2.1. TOP ADJUSTMENT SYSTEM

1

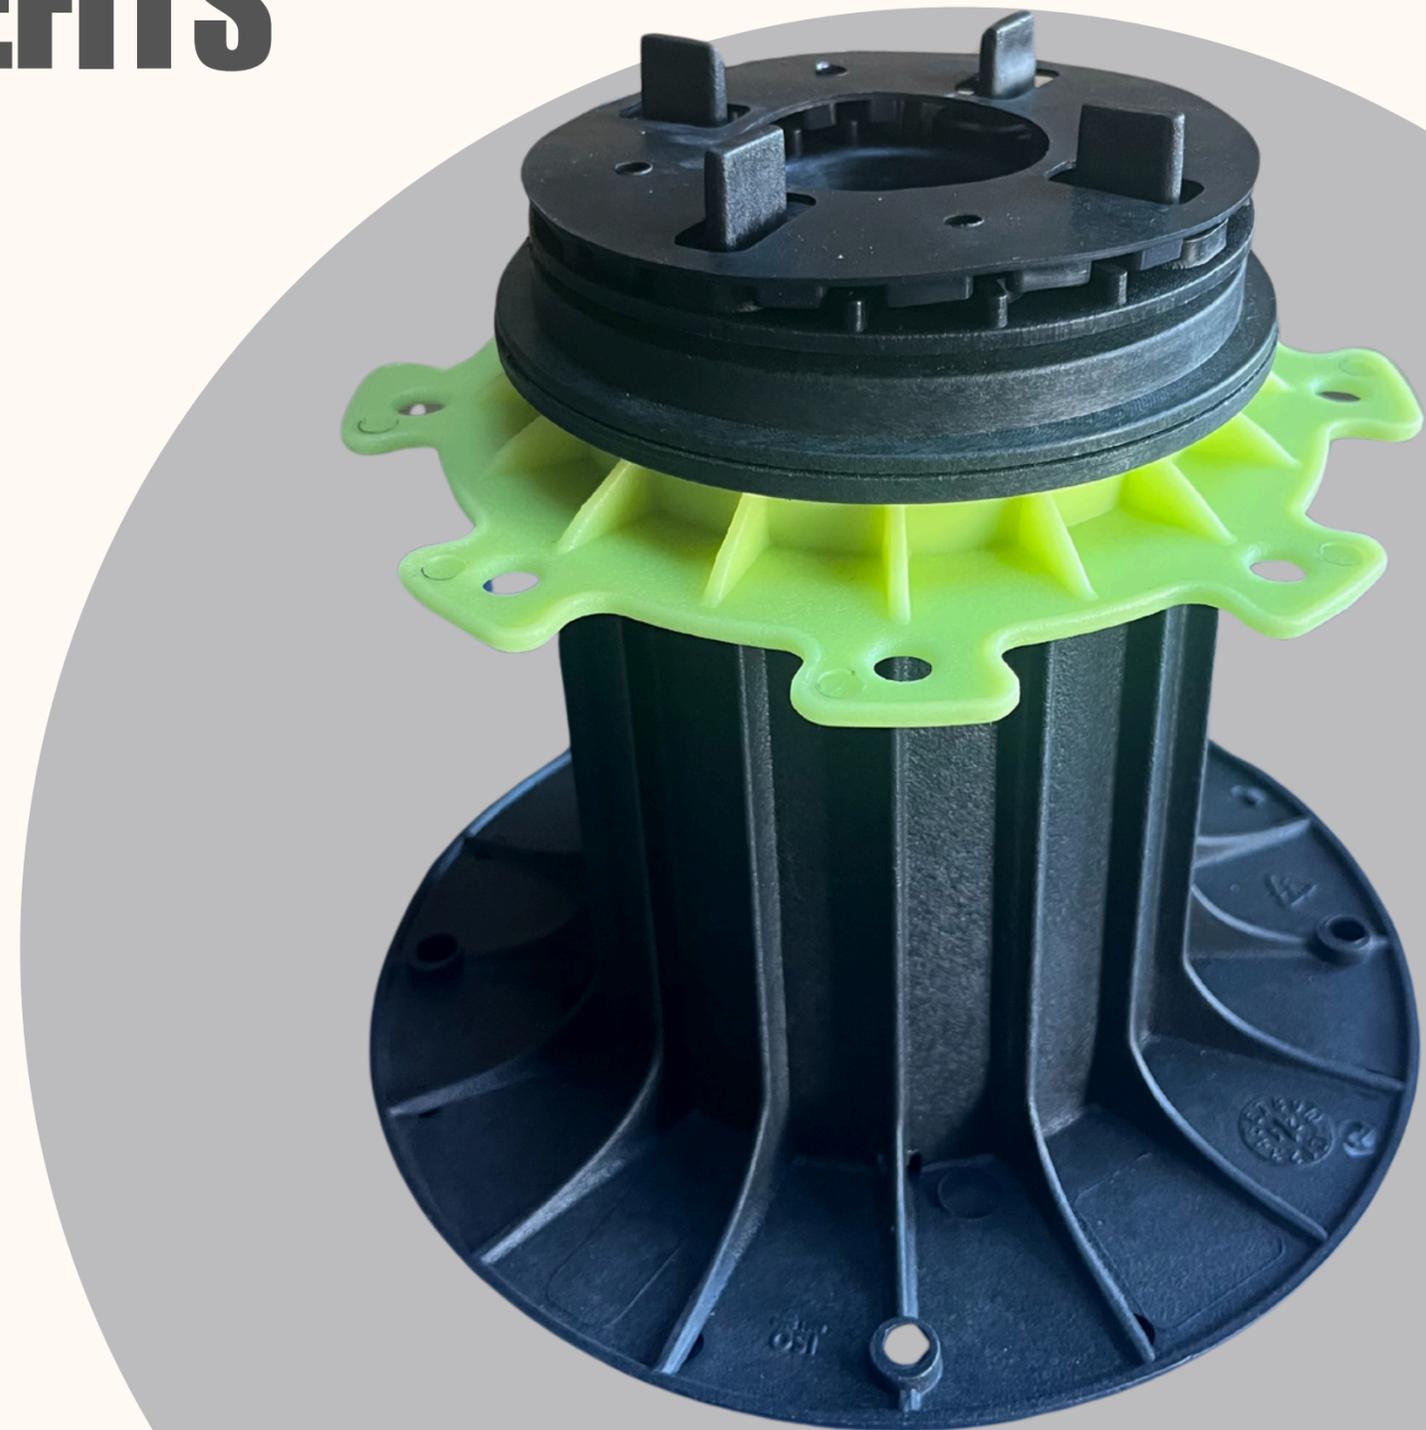

The top adjustment system allows installers to modify the pedestal height directly from the top, eliminating the need to access the base, which simplifies the installation process and reduces physical effort.

2

By enabling height adjustments without removing or repositioning tiles, the system improves accessibility, allowing for real-time modifications that ensure a precise and even flooring surface.

3

This innovative approach prevents the need for dismantling components, significantly reducing installation time while maintaining a secure and stable structure.

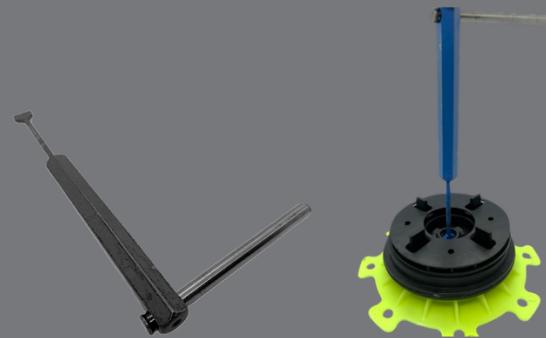

2.2. TOP ADJUSTEMENT COMPONENTS

- 1 SmartPlot Joints - Ensures secure tile fixation.
- 2 SmartPlot Shim - Provides fine adjustments for perfect leveling.
- 3 SmartPlot Slope - Automatically compensates for slopes up to 5%.
- 4 SmartPlot Lower Top Adjustable - Facilitates smooth height modifications.
- 5 SmartPlot Top - Ensures a secure connection between tiles and pedestals.
- 6 SmartPlot Base - Provides stability and weight distribution.

3. SMARTPLOT ADJUSTMENT TOOLS

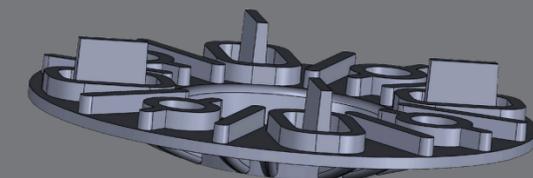

SmartPlot TopKey

- The SmartPlot TopKey enables precise height adjustments directly from the top of the pedestal, allowing for effortless modifications while ensuring a smooth and uninterrupted installation process.
- By removing the need to manually adjust from the base, it significantly reduces installation time and effort, streamlining the workflow and enhancing overall efficiency.

Lateral Adjustment

- The lateral adjustment system ensures precise tile positioning by allowing micro-adjustments to achieve consistent spacing. This prevents uneven gaps and misalignment, resulting in a professional and polished finish.
- By improving alignment, the system enhances both the durability and aesthetics of the installation, ensuring a seamless and visually appealing flooring surface.

Self-Leveling Head

- The self-leveling head automatically adjusts to slopes of up to 5%, compensating for surface irregularities and ensuring a stable, even installation.
- This feature enhances structural integrity while also facilitating proper water drainage, preventing stagnation and extending the lifespan of outdoor flooring installations.
